Stalis awarded place on G-Cloud 9 Framework

Supplier of specialist NHS Data Transformation and Integrated Care Record Services, Stalis Ltd, has been awarded a place on the Crown Commercial Service (CCS) G-Cloud Framework, as successful applicants to G-Cloud 9 have now been revealed. The G-Cloud 9 Framework is an online services marketplace which public sector organisations can use to purchase cloud-based services. It is designed to enable buyers to easily compare and procure digital services that suit their needs.

Stalis Ltd has 3 Cloud Software available to procure;

- **NHS CareXML® Data Archive;** Stalis' NHS data archive provides a secure repository for a wide range of healthcare services covering administrative and clinical data. The access is controlled depending upon user role and provides a consistent view of all data. The viewer is web based, intuitive and completely adapted to healthcare use.

- **NHS Data Quality Service;** Stalis' NHS Data Quality Service reviews data held on an existing system and gives in-depth feedback on problem areas. Stalis' specialist tools and extensive experience of NHS data provides a clearer understanding of the true state of data, whilst acting as a catalyst for a focused and effective improvement programme.

- **NHS CareInform Integrated Care Record Service;** CareInform is an N3 cloud-based integrated care record service offering users across all health and social care settings a complete long-term view of a patient's health and social care information based on a single integrated repository. It provides care professionals with access to high-quality data; the foundation for integrating services.

There are also have 2 Cloud Support Services available;

- **NHS CareXML® Data Transformation & Migration;** Migrate your patient healthcare data without disruption and with 100% confidence. The tools, services and methodology have been used successfully by over 20 NHS trusts. Launch your new healthcare information system with 100% trial-load success and no duplicate, partial, missing patient data or appointments.

- **NHS CareXML® Data Extraction & Data Quality Assessment;** Good data quality is essential to support healthcare organisations' management of patients and reporting to Commissioners. Stalis can extract data from multiple source systems and assimilate in an Integrated Care Record for data quality assessment monitoring and improvement. Data quality levels must be assured as part of any data migration.

INVESTOR IN PEOPLE

Andrew Meiner, Managing Director at Stalis said:

We are delighted to have had our application to join G-Cloud 9 accepted, and are looking forward to engaging with a wide range of healthcare organisations, who can now procure our full range of data migration services, as well as our Integrated Care Record Service, through this specialist framework.
Having our services available via another procurement route, means that we are making it easier for healthcare organisations to engage with us, enabling us to assist them through data migration projects and helping them achieve success both on time and within budget.
